OBJECTIVE

Enthusiastic and motivated Computer Science engineering student with a strong foundation in front-end development and basic backend skills. Experienced in building responsive designs, integrating APIs, and ensuring seamless user experiences. A beginner in app development, eager to learn and adapt to industry trends. Passionate about creating innovative solutions and continuously improving technical skills to excel in the field of software development.

SKILLS

Languages & Frameworks   : HTML | CSS | JavaScript | C/C++ | Python | React-Native | Node JS | Express JS

Tools & Technologies : Git | GitHub | GitHub Pages | Vercel | Android Studio | AI Tools .

PROJECTS

Personal Portfolio WebSite :   Personal Portfolio Website to showcase my skills, projects, and experience. The website is built using HTML, CSS, and JavaScript, ensuring a responsive and visually appealing design. It includes sections for my introduction, skills, projects, and contact details. Developed functionality and optimized the site for performance. This project demonstrates my frontend development expertise and serves as a professional online presence.[Visit]

PIXEL-GenAi :   AI Image Generator is a web-based application built using HTML, CSS, and JavaScript that leverages the power of advanced AI models for image generation. It allows users to input text prompts, which are then processed by an AI API to generate unique and high-quality images. The project demonstrates the integration of fetch API for making API requests, handling responses, and dynamically displaying generated images. This project showcases the potential of AI-driven creativity and real-time web interaction..[Visit]
